Centers for Disease Control and Prevention

Preventing HIV transmission, saving lives, reducing health care costs

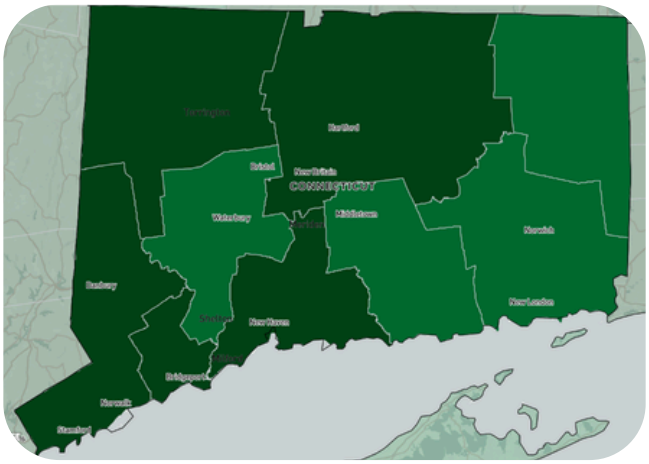
Connecticut funding

- CDC total (FY 2023): $160 million
- HIV, viral hepatitis, STI & TB prevention funding (FY 2023): $6,764,120
- HIV prevention funding (FY 2024): $3.8 million

In Connecticut, *only 35.2% of individuals who could benefit from PrEP* are prescribed medications for PrEP.

PrEP is *99% effective* at preventing HIV acquisition.

Every HIV transmission prevented saves *$500,000 to $1.1 million in lifetime health care costs.*



Rates of Persons Using PrEP per 100k, 2024

18 59 86 117 153

Impacts of HIV prevention funding:

- 89% of funding goes to health departments & community-based organizations
- A 12% decline in new cases from 2018 to 2022, saving between $5 billion - $10 billion in lifetime health care costs
- Critical infrastructure support for viral hepatitis, STIs and TB prevention
