Preventing HIV transmission, saving lives, reducing health care costs

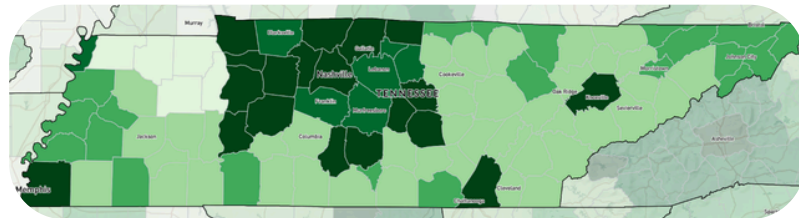

Tennessee funding

- CDC total (FY 2023): \$308 million
- HIV, viral hepatitis, STI & TB prevention funding (FY 2023): \$17,593,832
- HIV prevention funding (FY 2024): \$6.1 million
- Ending the HIV Epidemic (EHE) funding (FY 2024): \$4,100,000

In Tennessee, *only 31.2% of individuals who could benefit from PrEP* are prescribed medications for PrEP.

PrEP is *99% effective* at preventing HIV acquisition.

Every HIV transmission prevented saves *\$500,000 to \$1.1 million in lifetime health care costs.*

Rates of Persons Using PrEP per 100k, 2024

Impacts of HIV prevention funding:

- 89% of funding goes to health departments & community-based organizations
- A 12% decline in new cases from 2018 to 2022, saving between \$5 billion - \$10 billion in lifetime health care costs
- Critical infrastructure support for viral hepatitis, STIs and TB prevention
